frontend developer

PROJECTS

Smartone Education website

3 Months

- Established an educational platform for colleges, streamlining various administrative tasks and processes.
- Implemented a user-friendly registration process for colleges to enroll as institutes on the platform.
- Facilitated seamless registration of students by colleges, enabling easy access and download of their TC, mark sheets, and other necessary documents.
- Developed a platform for colleges to efficiently manage student records and academic documentation.

Marks - 74.0%

Class X

2019

Uttar Pradesh, Hindi

Marks - 80.0%

- Enhanced operational efficiency for various administrative tasks within the educational platform.

react Animation website

1 Weeks

this is a fully animation react based website. in this project i have used HTML,reactjs tailwind Css , framer-motion,GSAP

Instagram clone

1 Months

- Developed a web-based Instagram application using HTML, Tailwind CSS, React JS, and ShadowCn for the front-end.

- Utilized Node.js, Express.js, and MongoDB for the backend development.

- Employed React-Library for enhancing user interface and experience.

- Implemented various other technologies to enhance the functionality and performance of the application.

Job Portal

1 Months

I built a comprehensive job portal using the MERN stack, offering seamless functionality for both users and admins. Users can register, log in, apply for jobs, edit profiles, and reset passwords securely via OTP. Admins have advanced control, enabling them to post jobs, register and update company profiles, and manage hiring processes by approving or rejecting candidates. The platform ensures smooth navigation, secure authentication, and a user-friendly experience for effective job and company management
